

PLEASE READ LEAFLET CAREFULLY BEFORE USING THE NIX ULTRA® SYSTEM.

We at Nix® understand that having lice is more than just a hassle. It can be a nightmare, but eliminating lice doesn't have to be. We know how to remove lice and can help get your household back to normal. See results. Fast!

HOW DOES IT WORK? Nix® Ultra is a pesticide free solution applied to dry hair that kills lice through suffocation, by coating the lice and clogging the spiracles through which they breathe and destroying the organism's ability to excrete water.

Kit contains:

- 1 – 3.4 fl oz (100 mL) bottle of Nix Ultra® Solution
- 1 – Nix® Lice Removal Comb
- 1 – Instructions for Use Leaflet

Things You May Need to Get Started

- Bright light or magnifying glass
- Paper towels or tissue
- Wash cloth or towel
- Hair clips
- Clock or timer
- Sealable plastic bag
- Something to keep your child busy (movie, game, etc.)

DETECT

Using Nix® Lice Removal Comb, look closely at the scalp. Check each household member in bright light. Start at the base of the neck and divide the hair into small sections as you search for lice and their nits (eggs).

- Lice are usually light brown in color and look like sesame seeds. They often move quickly and can be found on the scalp or hair.
- Nits (eggs) are yellow, brown, or tan. They look like tiny seeds and are firmly attached to the hair shaft. Nits do not move.
- Look for tiny nits near scalp, beginning at back of neck and behind ears.
- Examine small sections of hair at a time.
- It is important to check all family members.
- **If at least one live louse is found, treat with Nix Ultra® solution and Lice Removal Comb.**

INDICATIONS FOR USE

Nix Ultra® Lice Treatment Kit is intended to kill and remove head lice and their eggs from adults and children two years of age and older.

CONTRAINDICATIONS

- Not for use by people with hypersensitivity to mineral oils or silicone.
- This product is only suitable for head lice (not pubic lice).
- Not for use on children under 2 years of age.

PRECAUTIONS

- Care should be taken to avoid contact with eyes. Protect eyes with wash cloth or towel.
- Do not use this product when the scalp is already very irritated or injured.
- Do not use this product under occlusion, e.g. by covering up the hair with a cap or wrapped foil.
- Do not use Nix Ultra® Solution for longer than directed or overnight while sleeping.

WARNINGS

- Keep out of reach of children.
- Stop use if signs of a rash or irritation occur.
- Avoid contact of solution with eyes and mucous membranes (nose & mouth). In case of contact, rinse thoroughly with water.
- For external use only. Do not swallow solution. If swallowed, seek medical help or contact a Poison Control Center (1-800-222-1222) immediately.
- **Keep treated hair away from fire, flame or other hot objects. Do not smoke during use or treatment.**
- If spilled, clean up immediately. Solution can be slippery.

INSTRUCTIONS FOR USE

Important: Read entire leaflet before use.

Step 1 – Apply

Spread Nix Ultra® solution on dry hair, completely saturating hair and scalp. Ensure coverage behind ears and on nape of neck. **Leave solution in hair for 10 minutes.**

Nix Ultra® solution is safe and non-toxic when used as directed, but care should be taken to avoid contact with eyes. Protect eyes with wash cloth or towel.

Step 2 – Wash

Wash hair thoroughly with regular shampoo. **Do not use conditioner or shampoo that contains conditioner.** Nix Ultra® solution conditions hair for easy combing with the Nix® Lice Removal Comb. Towel dry hair.

Step 3 – Remove

Use the Nix® Lice Removal Comb to remove nits and lice.

Part hair into four sections. Comb one section at a time. Start at top of head. Lift a 1-2 inch wide section of hair. Place teeth of comb as close to scalp as possible and comb with firm, even motion away from scalp to the end of the hair. Use clips to pin back each section of combed hair.

Clean comb during use by wiping lice and nits into clean tissue or dry paper towel. Discard tissue or paper towel into sealable plastic bag. After combing, recheck the entire head for lice and nits. When treatment is completed and all remaining lice and nits have been wiped from the comb, seal and discard plastic bag containing nits and lice. Soak the Nix® Lice Removal Comb in hot water (above 130°F) for 10 minutes before subsequent use. Do not boil comb. Check hair after 7 days. If lice or nits are present, repeat steps 1-3.

Helpful advice: Resume your normal haircare routine following treatment. Should your hair feel greasy after comb-out, it may be necessary to shampoo a second time.

Ingredients: dimethicone, C12-20 isoparaffin

CLEAN HOME AND PERSONAL ITEMS

- Use Nix® Lice Killing Spray (not included) for bedding and furniture. Nix® Lice Killing Spray kills lice and bedbugs and will not stain water-safe fabrics. **NOT FOR USE ON HUMANS.** See product label for precautionary statements.
- All personal headgear (hats, hair ribbons, etc.), scarves, coats, towels, and bed linens should be washed in hot water (above 130° F), then dried in a dryer using the hottest cycle for at least 20 minutes.
- Personal combs, including nit combs, and brushes should be soaked in hot water (above 130° F) for at least 10 minutes.
- Articles such as clothing, blankets, pillows or stuffed animals that cannot be washed should be dry-cleaned or sealed tightly in a plastic bag for a period of at least 2 weeks. Items should be taken out of the plastic bag outdoors and shaken before use.
- Vacuum all carpets, mattresses, upholstered furniture and car seats that may have come in contact with lice. Dispose of vacuum bags.

THE FACTS OF LICE

Anyone can get head lice – it has nothing to do with cleanliness or poor hygiene. Head lice are treatable and very rarely cause serious health problems.

What are head lice?

- Head lice are small insects that live and feed on blood from the human scalp.
- Head lice may get as big as sesame seeds.

What are nits?

- Nits are lice eggs laid on the hair near the scalp.
- Nits are oval shaped, tiny and yellow, brown, or tan, but appear white after hatching.
- Nits attach to hair with a waterproof glue-like substance that cannot be washed out or blown away.

What are Super Lice?

- Harder-to-eliminate Super Lice are lice that have developed resistance to traditional pesticide lice treatments. The number of Super Lice continues to increase in the United States.

Nix Ultra® Solution and Nix® Lice Removal Comb are specially designed to kill both Super Lice and regular lice, including eggs.

How to check for Lice and Nits?

- Check each household member in bright light.
- Watch for movement. Head lice may be hard to locate because lice avoid light.
- Look for tiny nits near scalp, beginning at back of neck and behind ears.
- Examine small sections of hair at a time.
- It is important to check all family members.
- **If lice or nits are found, use Nix Ultra® Solution and Lice Removal Comb.**

How do head lice spread?

- Head lice spread easily from close head-to-head (e.g., "selfies") or hand-to-head contact with persons who have lice.
- Lice may also spread by sharing hats, helmets, scarves, headphones, brushes, combs, bedding and clothing.

How can the spread of lice be prevented?

- Do not share or borrow personal items like combs, brushes or headbands.
- Do not share or borrow hats, sweaters, coats, scarves, helmets, headphones, pillows or stuffed animals.
- Store hats in coat sleeves or pockets. Hang coats separately, away from other people's hats and coats.
- Wash under fingernails if lice or nits are seen.
- Inspect children for lice daily when a lice outbreak occurs at school or day care.
